Introduction

CATS Canterbury actively seeks to provide an environment where all members of the community are safe from harm. As such, CATS Canterbury aim to ensure that the College community is protected, supported and educated regarding drug related issues, which includes alcohol and nicotine. Students are encouraged to respect their bodies and exercise control over what goes into them, in an informed and health promoting manner.

The College plays an important role in supporting and promoting attitudes, practices and understanding which encourage students to make informed decisions enabling them to choose a healthy lifestyle. We therefore strive to create an atmosphere in which students feel safe and able to discuss the problems and concerns, whilst developing an understanding of drugs and their use and misuse.

The College reserves the right to adopt a zero-tolerance policy in respect of the misuse and supply of drugs. The possession, use or supply of illegal and other unauthorised drugs (such as those which are legal in other countries but are controlled substances in the UK) within College boundaries is unacceptable. Illegal drugs have no place in CATS Canterbury.

In every case of an incident involving drugs or alcohol, the College's priority is the health and safety of the students and staff. If necessary, it should be dealt with as a medical emergency, administering any first aid and summoning appropriate support. Depending on the circumstances, parents or the police may need to be contacted. The Safeguarding Policy must be followed where relevant.

This policy has been developed regarding Department for Education advice and guidance: DfE and ACPO drug advice for schools (2012) which is non-statutory and was produced to help answer some of the most common questions raised by school staff in this area

Purpose

This policy applies to staff, students, parents/carers and partner agencies working with the College on the premises and within the perimeters and includes:

- Journeys in College time
- Work experience
- Residential trips
- During the College day
- Outside of the College day and in all residential accommodation

The overall responsibility for all misuse of drug issues within the College lies with the Principal. Her responsibility includes overseeing the planning and co-ordination of drug education and the management of the misuse of drugs incidents in accordance with the procedure laid out in this policy.

All staff should be fully aware of the procedures for managing incidents, including whom they should inform and who has authority regarding issues such as searching College property and involving the police.

Definitions

A drug is a substance people take to change the way they feel, think or behave. The term 'drugs' and 'drug education', unless otherwise stated, as used throughout this document to refer to all drugs:

- All illegal drugs (Misuse of Drugs Act 1971)
- All legal drugs*, including alcohol, tobacco and volatile substances (those giving off a gas or vapour which can be inhaled)
- All over the counter and prescription medicines

*CBD oil is a fairly new supplement to the UK. This oil is an extract from the cannabis derivative, hemp, so it contains very small traces of THC (in the UK there is a threshold of permitted THC in CBD oil of 0.2%). If a student is taking CBD oil, they won't experience any psychoactive effect and if they were to be drug tested, they will not give a positive result, so long as the recommended dose is adhered to. The tests used at CATS/CSVPA test for a minimum of 50ng/ml of THC, so any CBD oil bought legally in the UK would not show up in a test as the legal limit of THC allowed in CBD oil is 0.2%.

Drug Education in the curriculum

Drug education is a major component of drug prevention. Drug prevention aims to: minimise the number of young people engaging in drug use; delay the age of onset of first use; reduce the harm caused by drugs; and enable those who have concerns about drugs to seek help.

The aim of drug education is to provide opportunities for students to develop their knowledge, skills, attitudes and understanding about drugs and appreciate the benefits of a healthy lifestyle, relating this to their own and others' actions. Therefore, drug education in CATS College Cambridge/CSVPA allows an opportunity for children/young people to

- Increase their knowledge, understanding and clarify misconceptions about the short-and long-term effects and risks of drugs use
- Rules and laws relating to drugs
- Impact of drugs on individuals, families and communities
- Prevalence and acceptability of drug use among peers
- Complex moral, social and political issues surrounding drugs
- Develop their personal and social skills to make informed decisions and keep themselves safe and healthy, including:
 - Assessing, avoiding and managing risk
 - Communicating effectively
 - Resisting pressures
 - Finding information, help and advice
 - Devising problem solving and coping strategies
 - Developing self-awareness and self esteem
- Enable them to explore their own and other people's attitudes towards drugs, drug use and drug users, including challenging stereotypes, and exploring media and social influences.

Drug education is an entitlement for every student and is supported by Section 351, of the Education Act 1966 which requires every College to provide a balanced curriculum which:

- Promotes the spiritual, moral, cultural, mental and physical development of students at the College and of society.
- Prepares students at the College for the opportunities, responsibilities and experiences of adult life.

Approach

Drug education will be taught in a safe, secure and supportive learning environment. Ground rules will be agreed, established and reviewed periodically through discussion with students. Teachers may use a selection of active learning approaches, e.g. action research, mind-mapping, case studies, creative writing, literature, discussion, external contributors, drama visits, formal debate, group work, interactive ICT, local surveys, media analysis, peer education, questionnaires, role-play, simulations, structured games, theatre-in- education, video supported by follow-up discussion etc. External contributors are always interviewed by the College Matron or Nurse before their first input.

The class teacher will always share teaching the lesson and always be in the classroom. A copy of the Misuse of drugs policy will be made available to all outside speakers.

All students should be able to:

- Seek help if they have a problem. Within the College and accommodation help is available from the welfare team (including the College Nurse), teachers and House Parents.
- Encourage other students to seek help if they have a problem
- Access information about the effects of misuse on other people and on the quality of their own study/work
- Alert appropriate members of staff to any problems they see developing within the College, particularly where legal or health and safety obligations are paramount
- Co-operate with any investigation of suspected misuse
- Seek help or advice if they have been asked, or if they seek help voluntarily, to co-operate fully with the support and advice offered

Staff should:

- Offer information and advice concerning the services available to students who are experiencing misuse problems
- Support and offer educational events, awareness campaigns and activities that promote health and wellbeing in conjunction with other departments
- Encourage a positive approach to health and wellbeing through sport, recreation and other activities
- Ensure there is no misuse of or pressure to misuse, drugs/alcohol at any time but particularly at social functions or presentations:
 - If provision of alcohol on these occasions is allowed, then it should be moderate and plenty of non-alcoholic drinks should be available
 - Publicity for social events must not focus on alcohol or encourage its misuse

The role of the Police

Legal Drugs:

The police will not expect to be routinely involved in incidents involving legal drugs but the College will inform the police about the inappropriate sale or supply of tobacco, alcohol or volatile substances to students in the local area.

Illegal Drugs:

CATS Canterbury has no legal obligation to report an incident involving drugs to the police. Nevertheless, not informing the police may prove to be counter-productive for the College and wider community so the College may choose to do so. The police should, however, be involved in the disposal of suspected illegal drugs.

Police Interviews:

In the event of a student being arrested, a responsible adult needs to be present with the student.

Searches

All searches will be conducted under the guidance of the Search and Confiscation Policy.

Responding to drug incidents

Drug incidents may include:

- A student, parent/carer or staff member (including volunteers and governors) is thought to be under the influence of drugs/alcohol
- A student is found in possession of drugs or associated paraphernalia
- A student is found to be supplying drugs/alcohol on College premises (friends sharing drugs, student being coerced to supply drugs, a group of friends taking it in turn to bring drugs in for their own use).
- A student discloses that they or a family member/friend are misusing drugs.
- Drugs or associated paraphernalia found on College premises
- A student demonstrates, perhaps through actions or play, an inappropriate level of knowledge for their age
- A staff member has information that the sale/supply of drugs is taking place in the local area.

These incidents will initially be treated as a safeguarding concern and should be reported as such and actions taken should align with safeguarding considerations.

Immediate action to take when there is a suspicion that a student may have consumed drugs/alcohol

During Boarding hours, the Boarding Team Leads must make an assessment of whether the student or staff are at risk. If the student is at risk then they must immediately remove the student from the area of risk, wherever possible. If it is not possible then the Boarding Team Leads should immediately call the Emergency Duty Senior Leader.

In cases of suspected alcohol consumption, the student should be breathalysed to better assess the level of consumption and actions then taken in accordance with the table shown in Appendix 2. Should

a student refuse to be breathalysed the Boarding Team Leads should consider whether to take actions in line with the highest levels of consumption. During daytime hours any concerns should be reported as with any student welfare concern by informing the DSL or Deputy DSL.

Follow on actions

A careful investigation will take place to judge the nature and seriousness of each incident, the needs of those involved and the most appropriate response. For example:

- What does the student have to say?
- What do any witnesses have to say?
- Is this a one-off incident or longer-term situation?
- Is the drug legal or illegal?
- What quantity of the drug was involved?
- What was the student's motivation?
- Is the student knowledgeable and careful/reckless as to their own and others' safety and how was the drug being used?
- What are the student's home circumstances?
- Does the student know and understand the College policy and College rules?
- Where does the incident appear on a scale from 'possession of a small quantity' to 'persistent supply for profit'?
- If supply of illegal drugs is suspected, how much was supplied, and was the student coerced into the supply role, were they 'the one whose turn it was' to buy for others, or is there evidence of organised or habitual supply?

If during the course of the investigation the College decides that the police should be involved they should cease immediately in order to enable the police to conduct a full detailed enquiry.

Any response will balance the needs of the individual with those of the wider College community, and aim to provide students with the opportunity to learn from their mistakes and develop as individuals.

If because of a misuse problem (or for any other reason) a student acts in such a way as to endanger him/herself and/or others, the College will take corrective action to prevent injury/ damage or other serious risk. In this situation a dependency issue may be taken into account, but it will not automatically exempt the student concerned from the normal consequences of his/her serious misconduct.

Possible responses include:

- Early intervention and targeted prevention
- Referral
- Counselling
- Behaviour support plans
- Inter-agency programmes
- Fixed-period exclusion
- Pastoral support programmes
- A managed move

- Permanent exclusion

Some responses may serve to enforce and reinforce College rules. Any sanctions will always be justifiable in terms of:

- The seriousness of the incident
- The identified need of the student and the wider College community
- Consistency with published College rules, codes and expectations
- Consistency with disciplinary action for breaches of other College rules (such as theft, violence, bullying)

All students are to be made aware each year that CATS Canterbury reserves the right to impose a zero tolerance policy towards drug use. Any student who has been found in possession of or using illegal drugs may be permanently excluded. Should a student be allowed to return it will be on strict conditions which may include additional counselling and drugs testing.

Parents/Carers under the influence of drugs on College premises

When a member of staff suspects that they are dealing with parents/carers under the influence of drugs on College premises, staff should attempt to maintain a calm atmosphere. In such instances, a member of the welfare team or a member of the senior management team must be called to discuss with the parent/carer if alternative arrangements could be made. The focus for staff will always be the maintenance of the child's welfare, as opposed to the moderation of parent's/carer's behaviour. Any incident involving concern for the safety of a child must be treated as a safeguarding concern and staff must follow the College Safeguarding policy.

Staff conduct and drugs:

Refer to the staff Substance Misuse Policy for further details.

Tobacco – CATS Canterbury buildings are a 'no smoking' area.

Alcohol – There should be no consumption of alcohol by any staff during the working day, or while they have care of children/young people, for example in boarding houses or on College trips.

Staff misuse/abuse – if this is known or suspected the appropriate staff policy and procedures should be followed.

The Needs of Students

The College will ensure that students have access to up-to-date information on sources of help. Local and national help lines, youth and community services and drug/health services will be prominently displayed so that those in need of help and who are reluctant to approach College staff can easily access it. Drug education programmes will also include details of services and help lines, explain how they work and develop student confidence in using them. Smoking will be covered in the Colleges' PSHE Programmes.

Confidentiality:

Please refer to the Confidentiality Policy.

Appendix 2

Guide to and actions in light of Breath Alcohol Content (BrAC)

mg/l = .10 = Drinkers begin to feel moderate effects.

mg/l = .20 = Most people begin to feel relaxed, mildly euphoric, sociable, and talkative.

mg/l = .25 = Judgment, attention, and control are somewhat impaired. Ability to drive safely begins to be limited. Sensory-motor and finer performance are impaired. People are less able to make rational decisions about their capabilities (for example, about driving.)

mg/l = .35 = This is legal level for intoxication in the UK. There is a definite impairment of muscle coordination and driving skills.

Students should be informed of college rules/ procedure and sent to room for the rest of the evening. Monitored and checked again in 1 hour time.

mg/l = .45 = This is legally drunk. There is a clear deterioration of reaction time and control.

mg/l = .50 - .70 = Vomiting usually occurs, unless this level is reached slowly or a person has developed a tolerance to alcohol. Drinkers are drowsy.

Drinkers display emotional instability, loss of critical judgment, impairment of perception, memory, and comprehension. Lack of sensor-motor coordination and impaired balance are typical. Decreased sensory responses and increased reaction times develop. The vision is significantly impaired, including limited ability to see detail, peripheral vision, and slower glare recovery.

Student should be escorted to their room and asked to remain there for the rest of the evening. Monitored and checked again in 1 hour time.

mg/l = .70 = This level means the equivalent of 1/2 pint of whiskey is circulating in the blood stream.

mg/l = .80 – 1.20 = Drinkers are disoriented, confused, dizzy, and have exaggerated emotional states. Vision is disturbed, as is perception of colour, form, motion, and dimensions.

Drinkers have increased pain threshold and lack of muscular coordination. Drinkers stagger or lose the ability to walk and have slurred speech. Apathy and lethargy are typical.

Student should be escorted to their room and asked to remain for the rest of the evening. Monitored and checked hourly throughout the night. If condition worsens – Emergency services need to be called.

mg/l = 1.20 – 1.40 = Drinkers display general inertia, near total loss of motor functions, little response to stimuli, inability to stand or walk, vomiting, and incontinence. Drinkers may lose consciousness or fall into a stupor.

mg/l = 1.40 and over = Symptoms are complete unconsciousness, depressed or absent reflexes, subnormal body temperature, incontinence, and impairment of circulation and respiration.

Death may occur at 1.60 or higher.

Emergency services need to be called and advice from them documented and followed.
